

Use of aqueous dispersions comprising ethylene copolymer waxes

Abstract

- 5 Use of aqueous dispersions comprising at least one at least partially neutralized ethylene copolymer wax selected from among ethylene copolymer waxes which comprise, as comonomers in copolymerized form,
 - 10 (A) from 26.1 to 39% by weight of at least one ethylenically unsaturated carboxylic acid and
 - (B) from 61 to 73.9% by weight of ethylene,
and ethylene copolymer waxes which comprise, in copolymerized form,
15 (A') from 20.5 to 38.9% by weight of at least one ethylenically unsaturated carboxylic acid,
(B') from 60 to 79.4% by weight of ethylene and
20 (C') from 0.1 to 15% by weight of at least one ethylenically unsaturated carboxylic ester,
as auxiliaries for wastewater treatment.
